

Media release 15 April 2008

NEW ZEALAND RACING BOARD CONTINUES TO DELIVER STRONG FINANCIAL GROWTH

The unaudited figures from the New Zealand Racing Board for the first six months of the 2007/08 season show that despite the challenges imposed by the Equine Influenza outbreak in Australia, the business has continued to deliver strong turnover growth to the industry. Total wagering turnover has increased 6% over the comparative period last season to \$797 million.

Operating surplus before industry expenditure has increased more than 12% to \$75 million, up 5% against budget for the six month period. Net Betting Revenue was down approximately 1% on budget. However, a significant increase in the export of New Zealand racing product to Australia at the height of the Equine Influenza threat delivered International Racing royalties in excess of \$8.9 million, 350% above budget.

The Chairman of the New Zealand Racing Board, Michael Stiassny, said "the calendar changes implemented at the start of the 2007/08 racing season coupled with the Board's commercial agreements with Tabcorp have enabled the industry to maintain momentum in what has been quite a volatile period."

Maintaining operating surplus at this level over the remainder of the season will present a challenge to the New Zealand Racing Board in these current economic conditions.

ENDS

Statement of Accounting Policies

Reporting entity

The New Zealand Racing Board is a statutory body established pursuant to the Racing Act 2003.

The principal objectives of the New Zealand Racing Board are:

- (a) to promote the racing industry; and
- (b) to facilitate and promote racing betting and sports betting; and
- (c) to maximise its profits for the long-term benefit of New Zealand racing.

The financial statements are prepared in accordance with the Racing Act 2003. The Racing Act 2003 requires disclosure of budgeted amounts approved by the Board.

Statement of compliance

These unaudited, condensed Interim Financial Statements have been prepared in accordance with the requirements of NZ IAS-34: *Interim Financial Statements*.

For the purpose of the financial reporting the New Zealand Racing Board is a profit orientated entity.

Basis of preparation

These financial statements have been prepared on the basis of historic cost except for the revaluation of certain non-current assets and financial instruments outlined below. Cost is based on the fair value of the consideration given in exchange for assets.

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported.

The New Zealand Racing Board changed its accounting policies on 1 August 2007 to comply with NZ IFRS. The transition to NZ IFRS is accounted for in accordance with NZ IFRS-1: First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards, with 1 August 2006 as the date of transition. An explanation of how the transition from superseded policies to NZ IFRS has affected the financial position, financial performance and cash flows is discussed in note 16.

The accounting policies set out below have been applied in preparing the financial statements for the half year ended 31 January 2008, the comparative information presented in these financial statements for the year ended 31 July 2007 and the half year ended 31 January 2007, and in the preparation of the opening NZ IFRS statement of financial position at 1 August 2006 (as disclosed in note 16), the New Zealand Racing Board's date of transition.

Critical judgement in applying the accounting policies

In the process of applying the accounting policies, management has made the following judgements that has the most significant effect on the amounts recognised in the financial statements (apart from those involving estimations, which are dealt with below).

Fair Value Adjustment on Fixed Odds Multi Bets

The Fair Value of Open Fixed Odds Multibet positions have not been revalued as the Fair Value cannot be measured reliably.

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed, where applicable, in the relevant notes to the financial statements. These are estimates that require management's most difficult, subjective or complex judgements.

The following are the key sources of estimation uncertainty:

Long Service Leave

A provision for Long Service Leave has been established to recognise the future liability to the New Zealand Racing Board for employee benefits to the extent that it is probable that they will vest.

The provision established contains several key assumptions around tenure of employment, future increase in remuneration and retirement dates.

Make Good Provisions

A provision for Make Good Costs has been established to recognise the future liability to the New Zealand Racing Board for costs on the exit of leasehold property.

The provision established contains several key assumptions around lease tenure and average expected exit costs. Average expected exit costs have been estimated using knowledge of costs incurred over the past three years on exit of leasehold property.

Fair Value Adjustment on Fixed Odds Single Bets

Fair value adjustments recorded on open Fixed Odds Single betting positions have been calculated by applying the expected probability of each outcome to the potential gross dividend payable on any particular outcome.

The adjustment contains several key assumptions around the calculation of the deemed probability of an outcome arising.

Significant Accounting Policies

The following significant accounting policies have been adopted in the preparation and presentation of the financial statements.

(a) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the New Zealand Racing Board and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Net Betting Revenue

Net Betting Revenue consists of resulted Turnover less Dividends paid and payable to Customers and Duty and GST payable to the Inland Revenue Department. Except where otherwise noted, Net Betting Revenue is recognised at the time the betting event takes place.

Totalisator Revenue

Totalisator Revenue is recognised at the time the betting event takes place.

Fixed Odds Betting Revenue

Revenue is recognised as the net win or loss on an event. The amounts bet on an event are recognised as a liability until the outcome of the event is determined, at which time the revenue is brought to account. Open betting positions are carried at fair market value and gains and losses arising on these positions are recognised in revenue.

International Racing Royalties

International Racing Royalties is income earned by the New Zealand Racing Board through the export of television coverage of New Zealand racing events to Australian Betting Agencies. This revenue is recognised at the time that the racing event takes place.

Interest Income

Interest revenue is recognised on a time proportionate basis that takes into account the effective yield on the financial asset.

Racing Services Income

Racing Services Income refers to income the New Zealand Racing Board derives from providing on-course race day services to racing clubs, recovered as part of the funding arrangements from the Code bodies. This revenue is recognised at the time that the racing event take place.

(b) Foreign currency transactions

All foreign currency transactions during the financial year are brought to account using the exchange rate in effect at the date of the transaction. Foreign currency monetary items at reporting date are translated at the exchange rate existing at reporting date. Non-monetary assets and liabilities carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Exchange differences are recognised in the statement of financial performance in the period in which they arise.

(c) Goods and Services Tax (GST)

The statement of financial performance and statement of cash flows are prepared on a GST exclusive basis except for betting turnover and dividends paid to customers. The GST component in betting turnover represents the GST payable on betting deductions and net betting revenue as outlined in the Racing Act 2003. All items in the statement of financial position and statement of changes in equity are stated net of GST, with the exception of trade receivables and payables which are recognised inclusive of GST.

(d) Income Tax

The New Zealand Racing Board is exempt from income tax pursuant to section CW40(1)(a) of the Income Tax Act 2004.

(e) Inventories

Inventories, including betting slips and merchandise held for resale, are valued at the lower of cost and net realisable value, as determined on a weighted average basis. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

(f) Financial assets

Cash and cash equivalents comprise cash on hand, cash at bank and investments in money market instruments.

Investments are recognised and derecognised on trade date where purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value, net of transaction costs.

Financial assets are classified into the following specified categories: 'held-to-maturity' and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Loans and receivables

Trade receivables, loans, and other receivables are recorded at amortised cost less impairment.

Held-to-maturity investments

Corporate bonds are classified as held-to-maturity and are stated at amortised cost using the effective interest method less impairment, with revenue recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or where appropriate, a shorter period.

(g) Financial liabilities

Trade and other accounts payable

Trade and other accounts payable are recognised when the New Zealand Racing Board becomes obliged to make future payments resulting from the purchase of goods and services.

Unpaid dividends

Unpaid dividends represents the liability due to winning customers not yet claimed. Like Revenue Unpaid dividends are recognised at the time the betting event takes place.

Jackpot retentions

These accounts are established in accordance with the Racing Rules pursuant to section 52 of the Racing Act 2003. Transfers to these accounts comprise amounts set aside from the dividend pools of Pick6, Six Pack and Pools betting. Funds accumulated in these accounts are used exclusively for the purpose of supplementing the dividend pool on some occasions when the same form of betting is offered subsequently.

Other financial liabilities

Other financial liabilities are measured at fair value.

(h) Derivative financial instruments

The New Zealand Racing Board may from time to time enter into derivative financial instruments to manage its exposure to foreign currency risk, including forward exchange contracts.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in the statement of financial performance immediately. The New Zealand Racing Board has not designated any derivatives as hedges.

Fixed Odds Betting Revenue

Fixed Odds Betting positions are considered derivative financial instruments for the purposes of financial reporting. Refer to the Revenue recognition policy for Fixed Odds Betting Revenue in (a) above.

Embedded derivatives

Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of host contracts and the host contracts are not measured at fair value with changes in fair value recognised in profit or loss.

(i) Property, plant and equipment

Property, plant and equipment is measured at cost less accumulated depreciation and impairment.

The deemed cost for land and buildings is the valuation on the inception of the New Zealand Racing Board in 2003.

Depreciation is calculated on a straight line basis so as to allocate the cost of each asset over its expected useful life to its estimated residual value. Leasehold improvements are depreciated over the period of the lease or estimated useful life, whichever is the shorter. The estimated useful lives, residual values and depreciation method are reviewed at the end of each annual reporting period.

The current annual depreciation rates are as follows:

Buildings and fit out	2.5% - 10%	Leasehold improvements	15.0% - 20.0%
(at deemed cost)		Motor vehicles	15.0% - 33.0%
Computer hardware	15.0%- 33.0%	Operations and trackside	20.0%

equipment

20.0%

Furniture, office equipment and plant

(i) Leased assets

Leases are classified as finance leases wherever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Lessee

Assets held under finance leases are initially recognised at their fair value or, if lower, at amounts equal to the present value of the minimum lease payments, each determined at the inception of the lease. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance charges and reduction in the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged directly against income, unless they are directly attributable to qualifying assets, in which case they are capitalised.

Finance leased assets are amortised on a straight-line basis over the estimated useful life of the asset or the lease term, which ever is shorter.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Lease incentives

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefits of incentives are recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

(k) Non-current assets held for sale

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. The sale of the asset (or disposal group) is expected to be completed within one year from the date of classification.

(I) Intangible assets

Broadcasting licences and software are finite life intangible assets recorded at cost less accumulated amortisation and impairment. Amortisation is charged on a straight line basis over their estimated useful lives. The estimated useful life and amortisation method is reviewed at the end of each annual reporting period.

The current annual amortisation rates are as follows:

Broadcasting licences 5.0% – 17.0% Software 15%-25%

(m) Impairment of assets

At each reporting date, the New Zealand Racing Board reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the New Zealand Racing Board estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised in the statement of financial performance immediately, unless the relevant asset is carried at fair value, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cashgenerating unit is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised in the statement of financial performance immediately, unless the relevant asset is carried at fair value, in which case the reversal of the impairment loss is treated as a revaluation increase.

(n) Provisions

Provisions are recognised when the New Zealand Racing Board has a present obligation as a result of a past event, the future sacrifice of economic benefits is probable, and the amount of the provision can be measured reliably.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

(o) Employee benefits

Provision is made for benefits accruing to employees in respect of wages and salaries, annual leave, long service leave, and sick leave when it is probable that settlement will be required and they are capable of being measured reliably.

Provisions made in respect of employee benefits expected to be settled within 12 months, are measured at their nominal values using the remuneration rate expected to apply at the time of settlement.

Provisions made in respect of employee benefits which are not expected to be settled within 12 months are measured as the present value of the estimated future cash outflows to be made by the New Zealand Racing Board in respect of services provided by employees up to reporting date.

(p) Netting

The movement in Jackpot Retentions and Account Deposits have been presented net in the Statement of Cash Flows as transactions are settled over a short period of time.

(q) Standards or Interpretations not yet effective

Various standards, amendments and interpretations have been issued by the Accounting Standards Review Board but have not been adopted by the New Zealand Racing Board as they are not yet effective.

Application of these standards, amendments and interpretations, is not expected to have a material impact on the New Zealand Racing Board's financial position and results in the period of initial application.

TOTAL LOANS AND ADVANCES TO CLUBS	165	1,734	1,850	1,734

The Interest Rate on the outstanding loan is 4%. The New Zealand Racing Board is satisfied as to the ultimate collectability of this loan.

In July 2007, the Board approved additional loans of up to \$5.7m to the NZ Metropolitan Trotting Club and up to \$660,000 to the Manawatu Greyhound Racing Club. As at 31 January 2008, these loans had not been drawn down.

On 29 November 2007, Avondale Jockey Club repaid the outstanding balance on their club loan.

Activities				

12. Budget Comparative Information

International Racing Royalties, reported as part of Other Income were significantly higher than budget for the six months ending 31 January 2008 as a result of Australian Betting Agencies taking additional New Zealand racing product to compensate for Australian domestic product lost due to the outbreak of Equine Influenza.

The converse effect of the Equine Influenza outbreak has been that less Australian racing product has been imported into New Zealand, resulting in Turnover and Net Dividends decreasing against budget.

13. Actual Comparative Information

(a) Racing Services Income

Racing Services Income has increased by \$4.6m over the comparable period in the prior season as the New Zealand Racing Board now fully recovers the cost of providing on course trackside operations from the code bodies.

To compensate for this additional charge, the New Zealand Racing Board has increased funding to the code bodies by the same amount.

(b) Funding to the Racing Industry

Variable Code Funding and Research and Integrity Funding were previously reported together as Industry Operating Expenses. Due to a change in the Code Funding arrangement for the 2007/08 season, as agreed by the three Racing Codes and the New Zealand Racing Board, these costs are now an integral part of the overall funding policy.

For consistency with the current season, comparative information has been reclassified.

Nature of Reserves

Industry Revitalisation Reserve

The Industry Revitalisation Reserve was established from Retained Earnings at a value of \$10.0m during 2005. The purpose of this reserve is to help drive change and improvement across the Racing Industry. Since its establishment, over \$6.5m has been spent on specifically identified Industry Projects. Further details of the use of this reserve can be found in Note 15c.

General Reserve

The General Reserve accommodates appropriations of retained earnings for general purposes rather than for a specific item of future loss or expense.

16. Impacts of the adoption of New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS)

The New Zealand Racing Board changed its accounting policies on 1 August 2007 to comply with NZ IFRS. The transition to NZ IFRS is accounted for in accordance with NZ IFRS-1: First Time Adoption of New Zealand Equivalents to International Financial Reporting Standards, with 1 August 2006 as the date of transition

An explanation of how the transition from superseded policies to NZ IFRS has affected the New Zealand Racing Board's Financial Position, Financial Performance and Cash Flows is set out in the following tables and the notes that accompany the

Effect of NZ IFRS on the Statement of Financial Performance for the Half Year ended 31 January 2007 and for the year ended 31 July 2007

^{*} Reported financial position for the year ended 31 July 2006. Superceded Policies have also been restated to Financial Position categories as required under NZ IFRS.

** Reported financial position for the half year ended 31 January 2007. Superceded Policies have also been restated to Financial Position categories as required under NZ IFRS.

** Reported financial position for the year ended 31 July 2007. Superceded Policies have also been restated to Financial Position categories as required under NZ IFRS.

There are no material differences between the cash flow statement presented under NZ IFRS and the cash flow statement presented under the superseded policies.

Effect of NZ IFRS on the Cash Flow Statement for the periods ending 31 January 2007 and 31 July 2007

Notes to the Reconciliations of Income and Equity

(a) Reserves

The non-cumulative effect of the adjustments on General Reserves is as follows:

	1 August 2006	1 August 2006 31 January 2007	31 July 2007	Cumulati 34 Inh
	(s,000)	000.\$ZN	NZ\$'000	SZN
Fair Value Adjustment to Club Loans	b 23		(8)	
Employee Entitlements - Sick Leave	119		(8)	
Employee Entitlements - Long Service Leave	d 358	(22)	8	
Provision for Make Good Costs	e 223		(8)	
Fair Value Adjustment to Canwest Liability	(222)		40	
Fair Value Adjustment to Canwest Asset	j 350	(37)	(37)	

15 111 339 217 (26) 276

Total Adjustment to General Reserves

(b) Fair Value Adjustment to Club Loans

Club Loans have been adjusted on transition below face value to reflect the fair value of low-interest and interest free loans to racing clubs. The fair value of low-interest and no interest loans was determined by estimating the future value of expected cash flows, discounted using a market related rate

(16)

841

(c) Employee Entitlements - Sick Leave

A liability has been recognised on transition for accumulating sick leave to the extent that it is probable that employees will take more days than their future entitlement

(d) Employee Entitlements - Long Service Leave

The NZ Racing Board has a group of legacy employment contracts containing Long Service Leave entitlements. A liability has been recognised on transition for the estimated amounts probable to vest to employees in the future.

(e) Provision for Make Good Costs

A provision has been established for future anticipated costs associated with restoring leased premises to their original condition at the end of the lease term. This provision is based on the NZ Racing Board's previous experience and the percentage of lease term expired

(f) Reclassification of Software

Software has been reclassified from Property, Plant and Equipment to Intangibles in the Statement of Financial Position. Depreciation charged on Software has been reclassified to Amortisation in the Statement of Financial Performance

(g) Reclassification of the Current Portion of the Canwest Liability

The current portion of the liability due to Canwest in relation to the purchase of Radio Licenses during 2004 has been reclassified from Trade and Other Payables to Financial Liabilities in the Statement of Financial Position

(h) Reclassification of Sporting Body Levies

The cost of Levies payable to Sporting Bodies as a function of Sport Turnover and Margin has been reclassified from Betting Deductions to Operating Expenses in the Statement of Financial Performance

(i) Fair Value Adjustment to Canwest Liability

The Canwest Liability has been adjusted on transition below face value to reflect the fair value of future payments was determined by estimating the future value of expected cash flows, discounted using a market related rate.

(j) Fair Value Adjustment to Canwest Asset

The opening value of this intangible Asset has been adjusted to equal the fair value of the Canwest Liability, as adjusted for in (i) above. The change in capitalised value has also caused a reduction in the monthly amortisation charge against these assets.
